

## Electrical and instrumentation business automation (Vocational teaching Eleventh Five Year Plan)

By SHI LEI

paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 210 Publisher: China Electric Power Press Pub. Date: 2009-2-1. Contents: Preface Chapter 1 Chapter 1 Fundamentals of Electric Circuits 1.1 DC circuit composition and basic physical quantities 1.2 Ohm's law, linear resistance, non- linear resistive connection 1.4 1.3 resistance rating of electrical equipment, circuit voltage of several state of 1.5. the current source and the equivalent transformation 1.6 Kirchhoff's law and its application thinking questions and exercises in Chapter 2 sinusoidal AC circuits 2.1 amount of the three elements of the sine sine 2.2 2.3 volume phasor representation of sinusoidal AC circuit resistance, inductance and capacitance of 2.4 resistor, inductor series circuit 2.5 resistance, inductance, capacitance series circuit three-phase AC circuits 2.6 thinking questions and exercises in Chapter 3 semiconductor transistors and basic knowledge of application 3.1 3.2 PN junction diode transistor and its characteristics 3.3 3.4 3.5 basic transistor amplifier circuit of the composition and working principle of reflection questions and exercises based digital circuits Chapter 4 4.1 4.2 number system and basic logic gates encoding 4.3 Application of basic logic and thinking problems and exercises...

### Reviews

*Merely no phrases to spell out. I am quite late in start reading this one, but better then never. Your way of life period is going to be enhance once you complete reading this publication.*

-- **Joanie Hamill I**

*Basically no words to explain. I actually have study and that i am sure that i will gonna read once more again down the road. You are going to like just how the blogger publish this pdf.*

-- **Ms. Tamara Hackett DVM**
