

**The Fractionation of Crude Petroleum by Capillary Filtration: Dissertation
Submitted to the Board of University Studies of the Johns Hopkins
University in Conformity with the Requirements for the Degree of Doctor
of Philosophy**

Filesize: 8.52 MB

Reviews

Absolutely essential go through book. It is actually loaded with knowledge and wisdom You can expect to like the way the blogger compose this pdf.
(Pascale Bernhard)

**THE FRACTIONATION OF CRUDE PETROLEUM BY CAPILLARY FILTRATION: DISSERTATION
SUBMITTED TO THE BOARD OF UNIVERSITY STUDIES OF THE JOHNS HOPKINS UNIVERSITY
IN CONFORMITY WITH THE REQUIREMENTS FOR THE DEGREE OF DOCTOR OF PHILOSOPHY**[DOWNLOAD PDF](#)

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from The Fractionation of Crude Petroleum by Capillary Filtration: Dissertation Submitted to the Board of University Studies of the Johns Hopkins University in Conformity With the Requirements for the Degree of Doctor of Philosophy When in process of refinement, black vaseline is filtered through warm dry fullers earth the first product is an oil perfectly liquid at ordinary temperatures, while the succeeding portions are progressively more viscous until quite hard vaseline is obtained. This observation, that a fractional separation of oils in vaseline had been effected, suggested to D. T. Day that a like result might be obtained with crude petroleum. He applied this method to a sample of the green crude petroleum from the third sand, Venango County, Pennsylvania, and found that light products, chiefly gasoline, first appeared when such crude oil was allowed to filter down through a long glass tube filled with granulated or powdered fuller's earth. Following this a more elaborate system of specially constructed funnels similar to those used by the refiners of vaseline in testing the comparative value of various fullers earths was used. The results from this were briefly summarized in a paper upon the ability of petroleum to migrate in the earth. Engler later verified these results and showed that the separation was mechanical and that no oxidation was effected in the process. Day next used a large closed funnel of galvanized iron holding about one hundred pounds of fullers earth. When crude petroleum was dropped slowly and regularly into this, quite light oils at first, followed by the usual succession of heavier oils, were obtained. About the Publisher Forgotten Books publishes hundreds of thousands of rare and...
