

Conservation Planning: Balancing the Needs of People and Nature (Paperback)

By Craig Groves, Edward Game

W. H. Freeman, United Kingdom, 2015. Paperback. Condition: New. Language: English . Brand New Book. In a world of finite resources and complex environmental problems, we are faced with tough choices. Conservation Planning brings academic rigor to a pragmatic guidebook on making informed decisions about the way we navigate our relationship with the natural world. The authors draw on their extensive hands-on experience to provide an essential resource for practitioners, students, or researchers of conservation, natural resource management, or landscape planning and architecture. Conserving nature can be a complicated business whether in an urban environment, a production landscape dominated by agriculture or forestry, or more natural environments. Increasingly, planning and implementing a nature conservation or natural resource management project requires a range of skills across the ecological, social, economic, and political sciences. Conservation Planning provides the methods, tools, approaches, and case studies to plan a nature conservation project from inception to implementation and monitoring and evaluation. It draws on a wide range of disciplines and literature from conservation biology, landscape architecture, and land-use planning to decision science, natural resource economics, and sustainability. The book's primary audience is conservation scientists, planners, and practitioners in nongovernmental organizations; natural resource agency biologists...
