The cooperage department occupies a separate building adjacent to the stock house. Machine Shop. --This shop is well equipped with the best modern machinery, and its equipment consists of a 28-inch backgeared lathe, a 12-inch engine lathe, 24-inch back-gearred shaper, 24-inch power drill, power hack saw, and emery wheels. The blacksmiths shop occupies part of the machine shop. All the buildings thus described are substantial in construction and represent a factory above the average in the Portland cement manufacture. The power house, boiler house, coal mill, raw-material and cement mills are of substantial brick construction with heavy timber trusses and slate roofs. The wooden truss construction was made necessary on account of the crowded condition of the iron market and the impossibility of obtaining ironwork within any reasonable period at the time the plant was designed. The kiln building is constructed of steel columns with brick walls between. The steel trusses are carried on a concrete wall 12 feet high, with large arches between pilasters. These arches, together with an open floor under the kilns, form an ideal means of ventilation. The stone house, cooper shop and machine shop are of frame construction, and the stock house is a frame structure roofed and covered on the sides with slate. In connection with the establishment of this industry, the company has built an office, commissary department, houses for the general manager and other resident officers of the company, together with a number of houses...
